

CURRICULUM VITAE
RONALD A. COHEN, PHD, ABPP, APCN
MCKNIGHT PROFESSOR
DEPARTMENTS OF CLINICAL AND HEALTH PSYCHOLOGY,
NEUROLOGY AND PSYCHIATRY

EVELYN F. MCKNIGHT CHAIR FOR CLINICAL TRANSLATION IN COGNITIVE AGING
CENTER FOR COGNITIVE AGING AND MEMORY (DIRECTOR)
UNIVERSITY OF FLORIDA

PERSONAL PROFILE

Business Address: Cognitive Aging and Memory Program
McKnight Institute on Aging
University of Florida
Gainesville, FLA, 32608
Telephone Number: 352-294-5840
Business Fax: 352-265-8059
E-Mail: roncohen@ufl.edu; rac@brown.edu

EDUCATION

1976 B.Sc. (with honors) in Psychology, Tulane University
1982 Ph.D. in Psychology, Louisiana State University
Specialty: Clinical Psychology/ Neuropsychology

POSTGRADUATE TRAINING

1981-1982 Internship in Clinical Psychology. Neuropsychiatric Institute, UCLA Medical School.
Medical Psychology Specialization: Neuropsychology, Behavioral Medicine (American Psychological Association Accredited)
1982-1983 Post-doctoral Fellow, Neuropsychology. Univ. of Florida, Gainesville, FLA.

PROFESSIONAL LICENSES AND BOARD CERTIFICATION

2012-Present Florida License for Independent Practice in Clinical Psychology, License #5250
1983-1996 Massachusetts License for Independent Practice in Clinical Psychology, License #3723
1993-Present RI License for Independent Practice in Clinical Psychology, License #496.
1995 Diplomate: American Board Professional Psychology:
American Board of Clinical Neuropsychology

AWARDS

2015 Evelyn F. McKnight Endowed Chair for Clinical Translation in Cognitive Aging
2018 University of Florida Preeminent Term Professorship
2019 University of Florida Distinguished Research Professor
2019 Fellow, American Psychological Association

ACADEMIC APPOINTMENTS

2016-Present Professor, Clinical-Health Psychology, Neurology and Psychiatry, University of Florida

2014-Present Evelyn F. McKnight Chair for Clinical Translation in Cognitive Aging, University of Florida
2013-Present Adjunct Professor, Warren Alpert School of Medicine, Brown University
2012-2016 Professor, Aging-Geriatric Research, Neurology and Psychiatry, University of Florida
2004-2013 Professor, Warren Alpert School of Medicine, Brown University
1996-2004 Associate Professor, Warren Alpert School of Medicine, Brown University
1993-1996 Assistant Professor, Warren Alpert School of Medicine, Brown University
1992-1993 Associate Professor, Neurology and Psychiatry, Univ. Massachusetts Medical School
1990-1993 Assistant Professor, Neuroscience Program, Univ. Massachusetts Medical School
1992-1994 Associate Adjunct Professor of Psychology, Holy Cross College
1984-1993 Adjunct Assistant Professor of Psychology, Clark University
1989-1993 Adjunct Assistant Professor, Behavioral Neuroscience, Univ. Massachusetts
1983-1992 Assistant Professor of Neurology and Psychiatry, University of Massachusetts Medical School

UNIVERSITY/HOSPITAL APPOINTMENTS

2012-Present Director, Center for Cognitive Aging and Memory, University of Florida
2008-2012 Senior Neuropsychologist, Director of Neuropsychological Research Centers for Behavioral Medicine, The Miriam Hospital
1993-2008 Director of Neuropsychology Program, The Miriam Hospital
1988-1993 Director of Neuropsychology, University Massachusetts Medical Center
1992-Present Research Neuropsychologist, Central Massachusetts Medical Center
1985-1990 Neuropsychological Consultant, Milford Hospital
1983-1990 Co-Director, Headache Clinic, Neurology, UMMC
1983-1991 Consultant, Dizziness Clinic,
1983-1993 Neuropsychologist, UMMC

ACADEMIC AND HOSPITAL COMMITTEES

2012-Present Leadership Council, McKnight Brain Institute,
2003-Present Faculty Development Committee, Department of Psychiatry and Human Behavior Brown University School of Medicine
2001-Present Brain Science Program, Brown University
2000-Present Brain Sciences Program, Executive Committee, Department of Psychiatry, Brown Univ.
2000-Present Magnetic Resonance Foundation (MRF) Executive Committee, Brown University
1998-Present Alzheimer's Disease Center Steering Committee
1994-Present Geriatric Research Planning Committee, Department of Psychiatry and Human Behavior, Brown University School of Medicine
1994-Present Cerebrovascular Disease Neurobehavioral Research Committee, Department of Psychiatry and Human Behavior, Brown University School of Medicine
1994-Present Consultation-Liaison, Behavioral Medicine Planning Team, Miriam Hospital
1994-1999 Brain Bank Committee, Department of Psychiatry and Human Behavior, Brown University School of Medicine
1993-Present Neuropsychology Consortium Training Committee, Department of Psychiatry and Human Behavior, Brown University School of Medicine
1993-Present Behavioral Medicine Training Committee, Department of Psychiatry and Human Behavior, Brown University School of Medicine
1993-Present Memory and Cognitive Disorders Program, The Miriam.
1990-1993 Psychology Credentials Committee, UMMC.
1988-1993 Neuroscience Steering Committee, UMMC.
1985-1993 Psychology Training Committee, UMMC.
1985-1993 Alzheimer's and Related Disorders Program, UMMC.

MEMBERSHIP IN SOCIETIES AND ORGANIZATIONS

International Neuropsychological Society
Society for Neuroscience
American Psychological Association
American Neuropsychiatric Society
American Academy of Neuropsychology

OTHER APPOINTMENTS

1999- Investigator, Alzheimer's Disease Cooperative Study: NIA
1995- Publication Committee, International Neuropsychological Society

1995- Program Committee, International Neuropsychological Society
Research Advisory Committee, APA-Division 40
1998-1992 Consultant, State Head Injury Program, Commonwealth of Massachusetts

NATIONAL SCHOLARLY ACTIVITIES- Reviewer

2014 Neurology, JINS, JCEN, Brain, Stroke....(14 journals total)
2013- Circulation, Neuroimage, Stroke
2007- Brain Research
2006- Annals of Neurology
2005- Biological Psychiatry
2003- Journal of Clinical and Experimental Neuropsychology
2002- CNS Spectrums
2002- Health Psychology
2001- Academic Press, Book Reviewer, Neuropsychology Series
1999- Violence and Victims
2000- Journal of Neuropsychiatry and Clinical Neuroscience
2000- Stroke
2000- 1998- Journal of International Neuropsychological Society
1998- Journal of Cardiac and Pulmonary Rehabilitation
1998 American Journal of Cardiology
1998 Archives of Neuropsychology
1995 Int. Journal of Neuroscience
1996- Psychiatry Research
1995- J. Geriatric Psychiatry & Neurology
1995- Archives Clinical Neuropsychology
1995 Annals of Behavioral Medicine
1993- Neurology
1985 Journal of Behavioral Medicine

Editorial Boards

2001- The Clinical Neuropsychologist
2002- Journal of the International Neuropsychological Society
2007- Brain Imaging and Behavior
2008- Stroke

National Investigational Review Groups

2012-2013 NIH HIV-Aging IRG
2007- 2012 NIH BMIO Study Section (Permanent Member)

2005-2007 NIH BMIO Study Section (Temporary Member)
2001- NIH-NIA (Ad Hoc IRG reviewer)
2001- NIH-NIDA (Ad Hoc reviewer): HIV and Drug Abuse: International Grants
2000- Department of Veterans Affairs (Ad Hoc Reviewer)
1999 - Alzheimer's Association. Review Panel

Grant Mentoring

1999 Robert Paul - F32 NINDS. Neurocognitive manifestations of myasthenia gravis
2000 Tricia Zawacki - F32 NINDS. Emotional Processing deficits associated with amygdala and mesial temporal lobe damage in herpes simplex and temporal lobe epilepsy
2000 Patricia Boyle - F32 NIA. Impairments of activities of daily living associated with Alzheimer's disease and vascular dementia
2001 Lawrence Sweet - F32 NINDS Working memory and processing speed deficits associated with multiple sclerosis
2002 Rebecca Ready - F32 NIA. Quality of life changes in MCI and AD
2002 Robert Paul - K08 NIDA.
2002 David Moser - K23 NIA. Endothelial function & neurocognitive functioning in the elderly
2003 Angela Jefferson - F32 NIA. Executive function disturbance and severity of heart failure
2003 John Gunstad - F32 NLHBI. Self perceived cognitive dysfunction with CABG
2003 David Tate - T32 CFAR. Neuroimaging changes in CD4 suppressed patients in India
2003 Adam Brickman - Research Intern. MRI Morphometry
2005 Karin Hoth - F32 Cardiovascular Disease
2006 Beth Jerskey - T32 Aging Fellowship
2006 Zohar Zephrani-Brown Univ. PhD Candidate Cognitive Psychology
2006 Andreeana Haley, HTN and FMRI
2006 Lawrence Sweet, HF and FMRI (RO1 awarded)
2006 David Williams, Exercise and FMRI
2007 Uraina Clark, HIV Supplement to RO1
2008 Jason Hassenstab, NIH F32 Fellowship; FMRI & Metabolic syndrome
2009 Anna McKay. NIH F32 Fellowship. Attention training in older adults.
2009 Todd Levine, MD. NIH K-23 Application. FMRI: emotional processing in autism
2009 Assawin Gonvatana, NIAAA K99 award; Functional connectivity and DTI abnormalities in HIV
2011 Uraina Clark, K01, NIAAA Emotional processing associated with HIV and ETOH use
2013 Adam Woods, KL-2 award UF, Applications of t-DCS for cognitive aging
2013 Yonetta Dotson, NIA Pepper Career Development Award, Depression and Aging
2013 Nicole Whitehead (KL-2 submission UF), HIV, aging, depression and cognitive function
2014 Yenesil Cruz-Almeda, K-01 (Funded) K-01. Neural mechanisms of pain in the elderly
2014 Adam Woods, K-01 NIA Augmenting cognitive training using t-DCS
2014 Eric Porges, K-99, NIAAA. GABA as a modulator of ETOH effects on HIV-cognitive impairment
2015 Mollie Monnig, K01, NIAAA. Microbiome abnormalities in HIV
2017 Damon Lamb: CD2 VA. Neuroimaging of microvascular disease in aging
2016 Vaughn Bryant, NIAAA, F32, NeuroHIV
2017 Ellen Tracy NIMH (K24) Neural bases of chronic pain in African-American adults.
2018 Joseph Gullet, NIAAA, T32, Post-doctoral fellowship in NeuroHIV

Doctoral and Qualifying Examination Committees at UF

- 1) Talia Seider: Primary Mentor, Chair
- 2) Vaughn Bryant, Primary Mentor Chair
- 3) Amanda Garcia: Primary mentor, Chair
- 4) Elle Wiggins: Committee member
- 5) Lindsay Rotblatt: Committee member

- 6) Lawrence Burrell: Committee member
- 7) Emeka Okafor, Committee member, mentor
- 8) Sunil Swamee, Committee member, mentor
- 9) Joshua Tosche: Committee member
- 10) Joshua Kirton, Committee member
- 11) Jacob Jones, Committee member

PUBLICATIONS IN PEER-REVIEWED JOURNALS

1977

1. **Cohen RA**, Izawa, C (1977) The effects of phonetic symbolism in paired associate learning. *Bulletin of the Psychonomic Society*.

1981

2. Kunen S, **Cohen, RA** (1981) A level of processing analysis of Bloom's Taxonomy. *Journal of Educational Psychology*.

1983

3. Williamson D, **Cohen, RA**, et al. (1983) A controlled evaluation of a self-help and therapist-assisted program for migraine and muscle contraction headache. *Headache*.
4. **Cohen RA**, Williamson D, Jarrell P, Monguillot J, Waters, WF. (1983). Psychophysiological response specificity and stereotopy for migraine and muscle contraction headache. *Journal of Behavioral Medicine*, 6:240-265.

1984

5. Waters WF, **Cohen RA**, Bernard, BA, Bucu, SM, Dreger, RM. (1984) ANRSI: An Autonomic Nervous System Response Inventory. *Journal of Behavioral Medicine*, 7(3):315-341.

1985

6. **Cohen, RA**, Waters, WF. (1985). Psychophysiological Correlates of Levels and States of Cognitive Processing, *Neuropsychologia*, 23(2):243-256.

1986

UNIVERSITY TEACHING ROLES

- Institution: University of Florida, Gainesville, FL
Role: Professor
Dates: 2001– 2012
Sections: 1 hour/week
Task: Mentoring neuropsychology interns, fellows, and junior faculty.
- Institution: Brown University, Providence, RI
Role: Grant Writing Seminar, Neuropsychology, DPHB
Dates: 2001– 2012
Sections: 1 hour/week
Task: Mentoring neuropsychology interns, fellows, and junior faculty.
- Institution: Brown University, Providence, RI
Role: Magnetic Resonance Foundation
Dates: 2001– 2012
Sections: 4 hours/month
Task: Development of functional imaging programs and training at Brown University
- Institution: Brown University, Providence, RI
Role: Magnetic Resonance Foundation
Dates: 2001– 2012
Sections: 4 hours/month
Task: Development of functional imaging programs and training at Brown University
- Institution: Brown University School of Medicine, Providence, RI
Course: Affinity Group Program: The Mind-Body Interface
Dates: August 2002 – 2012
Sections: 16/Year

Students: 12 Medical Students
Role: Course Leader

Institution: Brown University, Providence, RI Department of Philosophy
Course: Mind-Body Symposium
Dates: August 2001– 2012
Sections: one
Students: 50
Topics: Discussion of the Mind-Body Problem

Institution: Brown University School of Medicine, Providence, RI
Course: Neuropsychology Seminar Series
Dates: August 1993- – 2012
Sections: 3-4/Year
Students: 8-10
Topics: Attention, Memory, Higher Visual Functions, fMRI

Institution: Brown University School of Medicine, Providence, RI
Course: Neuropsychology Rounds
Dates: August 1993- – 2012
Sections: 1-2 /Year
Students: 10-20
Topics: Various clinical and research area

Institution: Brown University School of Medicine, Providence, RI
Course: Geriatric Psychiatry Seminar Series
Dates: August 2001 – 2012
Sections: 1-2/Year
Students: 6-10
Topics: Neuropsychological Assessment of the Elderly; Vascular dementia

Institution: Brown University School of Medicine, Providence, RI
Course: Post-Doctoral Neuropsychology Mentor
Dates: August 1996– 2012
Sections: 10 hours a week
Students: 4 fellows
Role: Serve as research mentor to post-doctoral fellows in neuropsychology.
Mentor to five fellows on their F32 grants and research career development.

Institution: Brown University School of Medicine, Providence, RI
Course: Clinical Post-Doctoral Neuropsychology Supervisor/Mentor
Dates: August 1993- – 2012
Sections: 4 hours a week
Students: 10-20
Topics: Clinical neuropsychology

Institution: Brown University School of Medicine, Providence, RI
Course: Research Mentor, Psychiatry Fellows
Dates: July 1994 – 2012
Students: 1/year

Roles: Have supervised/advised four psychiatry residents/fellows on research projects.

Institution: Brown University School of Medicine, Providence, RI
Course: Clinical Psychology Internship: Clinical Neuropsychology Rotation

Dates: August 2001– 2012

Sections: 8 hours a week

Students: 1/rotation

Topics: Clinical neuropsychology

Institution: Brown University School of Medicine, Providence, RI
Course: Clinical Psychology Internship: Clinical Neuropsychology Rotation
Dates: July 2001– 2012
Sections: 2 hours a week
Students: 1/rotation
Topics: Clinical neuropsychology

Institution: Brown University School of Medicine, Providence, RI
Course: Clinical Psychology Internship: Research Placement Supervisor
Dates: August 2001– 2012
Sections: 4 hours a week
Students: 1-2/ year
Topics: Neuropsychological Research

Institution: Brown University School of Medicine, Providence, RI
Course: Clinical Psychology Internship: Behavioral Medicine Seminar Placement Supervisor
Dates: August 1995– 2012
Sections: 1/year
Students: 4-6
Topics: Neuropsychological applications to behavioral medicine

Institution: Brown University School of Medicine, Providence, RI
Course: Consultation-Liaison Supervisor
Dates: August 1994-2000
Sections: 8 hours a week
Students: 2/rotation
Topic: Inpatient clinical supervision

Institution: Clark University – Departments of Biology and Psychology, Worcester, MA
Course: Cognitive neuroscience (Bio 364),
Dates: 1993-1994
Sections: 8 hours a week
Students: 12/seminar
Topics: Cognition and the brain

Institution: Holy Cross College – Department of Psychology, Worcester, MA
Course: Cognition & Memory (Psych 305)
Dates: 1993-1994
Sections: 8 hours a week
Students: 26/seminar
Topics: Cognitive psychology.

Institution: University of Massachusetts Medical School, Worcester, MA
Role: Director of Neuropsychology Training
Dates: 1988-1993
Sections: 2 hours a week

Institution: University of Massachusetts Medical School, Worcester, MA
Role: Founding Member, Clinical Psychology Training
Dates: 1989-1993
Sections: 2 hours a week

Institution: University of Massachusetts Medical School, Worcester, MA
Role: Neuropsychology Clinical Supervisor
Dates: 1985-1993
Sections: 12 hours a week

Institution: University of Massachusetts Medical School / Worcester State Hospital
Course: Neuropsychology Seminar
Dates: 1985-1993
Sections: 4 hours a week
Students: 4
Topic: Clinical Neuropsychology

Institution: University of Massachusetts Medical School, Worcester, MA
Course: Neuropsychology Seminar, Neurology Residency Training Program
Dates: 1988-1993
Sections: 1/semester
Students: 10-20
Topics: Various topics in neuropsychology

Institution: University of Massachusetts Medical School/Worcester State Hospital
Course: Higher Cortical Functions Seminar
Dates: 1983
Sections: 1/semester
Students: 15
zTopic: Attention and memory

Augmenting Cognitive Training in Older Adults – The ACT Grant

This randomized clinical trial examines the effect of augmenting cognitive training with transcranial direct current stimulation to maximize cognitive and functional outcomes older adults experiencing age-related cognitive decline. Change in well-validated measures of everyday abilities and neurocognitive function will serve as outcome measures. Functional and structural neuroimaging biomarkers of neural plasticity and learning (fMRI, GABA MRS, etc.) will measure intervention-associated alterations in specific brain regions impacted by cognitive aging.

National Institute of Health NIAAA

Alcohol and HIV: Biobehavioral Interactions and Intervention

The goals of this program project are to study the effects of alcohol use on HIV disease progression, the effects of interventions to reduce alcohol use in HIV-infected populations, and the effects of alcohol on sexual decision making. The project also fosters multidisciplinary collaborations and training in research on alcohol and HIV and dissemination of research findings to clinicians treating addictions and HIV. Research Component 1 (Cohen, PI) is a continuation of the study being conducted in the parent ARCH, but will now examine the effects of reducing alcohol consumption via a motivational interviewing approach in HIV-infected heavy drinkers, with a specific focus on changes in cognitive performance, functional brain response on fMRI, and cerebral metabolite abnormalities (MRS).

Combining tDCS and neurorehabilitation to treat age-related deficits of mobility and cognition

This study examines whether brain stimulation is effective in increasing neural plasticity, thereby enhancing motor functions and mobility in older adults. In my role as co-I, I provide support for the neuroimaging conducted as part of the protocol.

R01DA042069 (Cook, PI) \$20,093 08/15/2017 – 03/31/2022 .60 CM

National Institute of Health NIDA

Health outcomes and cognitive effects of marijuana use in people living with HIV/AIDS. The overarching goals of this study are to obtain evidence regarding the influence of marijuana on major health outcomes and behavior in PLWH in order to help guide clinical recommendations and identify risk factors for consequences.

U01AA020797 (Cook, Cohen, MPIs) \$63,200 09/01/2016 – 06/30/2021 1.8 CM

National Institute of Health NIAAA

Effects of experimentally-induced reduction alcohol use on cognitive and brain function in HIV-infected adults. This U01 Project examines the effects of reduced alcohol consumption on cognition and brain functioning among HIV infected people who are heavy drinkers. A contingency management approach is employed by which participants are given financial incentive in an escalating fashion the longer they go without drinking. Electronic alcohol monitors are worn to verify actual alcohol consumption on a continuous basis. Participants undergo cognitive and neuroimaging assessments at baseline (Pre-CM) and then at 30 days of CM and after completion of CM at 90 days. Follow up assessments are conducted one year post baseline.

R21AG054876 – (Williamson, PI) \$7,362 09/01/2017 – 05/31/2019 .36 CM

National Institute of Health NIA

Treatment of mild cognitive impairment with transcutaneous vagal nerve stimulation. This study examines whether cognitive and brain functioning in MCI can be improved via vagal stimulation applied in conjunction with cognitive training.

U01AA026225 – (Barve, Cohen, Cook PI's) \$24,369 09/22/2017 – 08/31/2018 .60 CM

National Institute of Health NIAAA

This U01 project contains two components, one which involves a collaboration between Florida investigators from UF, UM, and FIU who are part of the SHARC and Dr. Barve and his group at the University of Louisville. This study examines the impact of abnormalities in the gut microbiome associated with HIV and heavy ETOH use. Stool samples collected at the Miami site from participants enrolled in U01AA020797 are sent to Dr. Barve's laboratory and biomarkers are derived. These biomarkers are examined relative to cognitive, neuroimaging, and

clinical measures collected at three time points. Dr. Cohen's laboratory is responsible for the analysis of cognitive and neuroimaging data, and resulting manuscripts.

Microbiome study of HIV and aging

The Role of Gut Microbial Dysbiosis and Aging on HIV- associated neurocognitive and brain dysfunction
This study extends our current research on neuroHIV and the contribution of the gut-liver-brain axis to neurocognitive and brain abnormalities. In this project we will recruit HIV+ and HIV- adults ranging in age from young adulthood to advanced age. The project examines of the microbiome on the interaction of age and HIV infection. The methods are similar to those employed in the U01 study (longitudinal neuroimaging, cognitive assessment, biospecimens), but with a different cohort in which ETOH is not the basis for recruitment.

Predicting Brain Changes in HIV/AIDS

This project greatly advances the ability to map, and predict, brain changes in people living with HIV/AIDS. HIV/AIDS is perhaps the greatest threat to public health worldwide in the 21st century. 40 million people are HIV-infected - a shocking 1 out of every 100 people aged 18-45 - and 40% have some neurological or cognitive impairment. This work offers 3 immediate public health consequences: (1) new methods to predict whether a person with HIV/AIDS will show imminent brain decline; (2) enhancing basic neuroscience, identifying brain circuits disrupted by the virus, and (3) a clear method to boost power for clinical trials of drugs to treat the brain in the millions of people now living with HIV/AIDS.

Southern HIV Alcohol Research Consortium (SHARC) Admin and Research Support Cure

The objective of this proposal is to establish the administrative structure and to provide research support for the SHARC, a collaboration that links several universities and investigators with a common goal of supporting

new research related to HIV and alcohol consumption.

Role: Co-I.

1U54EB020403-01 ENIGMA: Center for Worldwide Medicine, Imaging and Genomics PI: Thompson, P

The **Enigma** Center for Worldwide Medicine, Imaging and Genomics is an unprecedented global effort bringing together 287 scientists and all their vast biomedical datasets, to work on 9 major human brain diseases: schizophrenia, bipolar disorder, major depression, ADHD, OCD, autism, 22q deletion syndrome, HIV/AIDS and addictions. **Enigma** integrates images, genomes, connectomes and biomarkers on an unprecedented scale, with new kinds of computation for integration, clustering, and learning from complex biodata types. **Enigma**, founded in 2009, performed the largest brain imaging studies in history (N>26,000 subjects; Stein +207 authors, Nature Genetics, 2012) screening genomes and images at 125 institutions in 20 countries.

Responding to the BD2K RFA, ENIGMA'S Working Groups target key programmatic goals of BD2K funders across the NIH, including NIMH, NIBIB, NICHD, NIA, NINDS, NIDA, NIAAA, NHGRI and FIC. **Enigma** creates novel computational algorithms and a new model for Consortium Science to revolutionize the way Big Data is handled, shared and optimized. We unleash the power of sparse machine learning, and high dimensional combinatorics, to cluster and inter-relate genomes, connectomes, and multimodal brain images to discover diagnostic and prognostic markers. The sheer computational power and unprecedented collaboration advances distributed computation on Big Data leveraging US and non-US infrastructure, talents and data. Our projects will better identify factors that resist and promote brain disease, that help diagnosis and prognosis, and identify new mechanisms and drug targets. Our Data Science Research Cores create new algorithms to handle Big Data from (1) Imaging Genomics, (2) Connectomics, and (3) Machine Learning & Clinical Prediction. Led by world leaders in the field who developed major software packages (e.g., Jieping Ye/SLEP), we prioritize trillions of computations for gene-image clustering, distributed multi-task machine learning, and new approaches to screen brain connections based on the Partition Problem in mathematics.

Our **Enigma** Training Program offers a world class Summer School coordinated with other BD2K Centers, worldwide scientific exchanges. Challenge-based Workshops and hackathons to stimulate innovation, and Web Portals to disseminate tools and engage scientists in Big Data science. **Dr. Cohen is a co-I (10% effort) and director of HIV data initiative**

“Improving Adherence and Cognition in Substance-Using HIV Patients”

Substance abuse in the context of HIV infection is a major problem that affects clinical outcome and interferes with adherence to treatment regimens. This study examines the value of a computer-based cognitive training program (Vigorous Mind) to enhance attention and executive functioning as a means of improving organizational and planning ability and ultimately treatment adherence. The study focuses on further development of the program for use in this population and initial testing to determine its acceptability and whether a larger scale clinical trial is warranted.

Role: Principal Investigator

5 R01 MH074368-05 (Ronald Cohen, PI)

09/30/06–08/31/13

“Age Effects on HIV-Associated Brain Dysfunction”

The goal of this project is to achieve greater understanding of how HIV infection interacts with aging to cause brain abnormalities that affect neurocognitive functioning. Dr. Cohen oversees this entire project.

Role: Principal Investigator 20% effort

Previously Funded Grants

1. National Institute of Health (NIA RO1, 2000-2004) (Principal investigator) Neurocognitive effects of cardiovascular disease in the elderly. \$1,250,000
2. National Institute of Drug Abuse (ISTART grant) Co-Investigator, (Tara White, PI). An fMRI study of cocaine effects on impulsivity. \$100,000.
3. National Institute of Allergy and Infectious Diseases- Center For AIDS Research-Supplement (2001-

2002).(Principal Investigator) HAART adherence and neurocognitive functioning among HIV-infected elderly. \$60,000). Supplemental developmental grant to the Brown University Center for AIDS Research (CFAR: PI-Charles Carpenter, MD).

4. National Institute of Health (Alzheimer's Disease Cooperative Study, 2000-2001) (Co-Investigator) A multicenter trial of rofecoxib and naproxen in Alzheimer's Disease \$60,000
5. Interneuron Pharmaceutical Corp. IP302-012, 1997-2000) (Principal Investigator), The effects of citicolinee in the treatment of vascular dementia \$198,000
6. Dupont Corp. (1987-1988), Grant # 404-024-5 (Co-Principal Investigator). Effect of Amantadine on MS associated fatigue (\$25,000).
7. Healy Grant (1989), UMMC. (Principal Investigator) The neurobehavioral characteristics of fatigue associated with Multiple Sclerosis (\$10,000)
8. NIH-BRSG (1991). UMMC. (Principal Investigator) Electrophysiological correlates of ADD subtypes (\$8,800)
9. Rhode Island Foundation (1994) Co-Investigator. The role of the Alzheimer's amyloid precursor protein in cerebral vascular disease. (\$4,411-animals & supplies).

Ronald A. Cohen, PhD: Academic Summary

I am the Evelyn McKnight Chair for Clinical Translation Research in Cognitive Aging and director of the Center for Cognitive Aging and Memory (CAM) at the University of Florida (UF). The center is funded by an endowment from the McKnight Brain Research Foundation. I am also Professor in the Clinical Health Psychology, Neurology, and Psychiatry The center, and my research laboratory focuses on successful cognitive aging conducting studies of brain aging-mechanisms, age-associated comorbidities that affect cognition and the brain (e.g., heart disease, obesity, diabetes, HIV, metabolic disturbances, and alcohol and drug use), and interventions to prevent, slow, and/or reduce age-associated cognitive decline. The CAM is multidisciplinary, and integrates neurocognitive, neuroimaging, and laboratory biomarker methods. My research employs multimodal neuroimaging enabling the simultaneous examination of brain structure, function, physiology, and metabolism. My current NIH-supported grants are directed at HIV-age, HIV-alcohol, HIV-marijuana, and HIV-microbiome interactions in the context of HIV. Other R01 projects include a study of the effects of bariatric surgery on cognition and the brain, and large multi-site R01 clinical trial (NIA) the examines whether brain stimulation in conjunction with cognitive training augments training benefits in older adults. We also have ongoing studies of cognitive and brain aging in the oldest old (adults >85 years). including the contribution of vascular and metabolic disturbances to brain dysfunction. I have published over 300 peer-reviewed articles, and numerous book chapters on topics of related to my expertise and research. My cognitive neuroscience work has been directed at the neural mechanisms underlying attention, working memory, and executive functions, I authored "Neuropsychology of Attention" in 1993 which was the first book on this topic in the field, which I just updated and published as a second edition in 2013. I have also co-authored/edited a book "Brain Imaging in Behavioral Medicine and Clinical Neuroscience", and another "Heart Disease and Neuropsychology".

My program of research was an outgrowth of interest and expertise in neuropsychology and cognitive neuroscience with particular focus on attentional influences on cognitive functions, including studies of the effects of particular neurological brain disorders and psychiatric disturbances on effort and attentional control. This led to a number of publications focusing on the cingulate cortex, short-duration timing, intentional behavior and also emotional processing. My clinical research at the time focused on neurodegenerative disease in the elderly, with specific lines of research directed at vascular dementia. At Brown University, I directed a Memory Loss Program that focused on brain disorders, including neurodegenerative diseases and also medical disorders affecting cognition in older adults. My lab employed quantified FLAIR MRI methods to measure white matter abnormalities in VaD, along with cortical and subcortical morphometry, and functional imaging. As my work on VaD progressed, it became clear that it was necessary to examine patients with vascular disease and risk factors before they developed dementia. This led to R01 funded studies focusing on cognitive and neuroimaging abnormalities associated with cardiovascular disease, including heart failure. This work incorporated systemic vascular indices in conjunction with structural and functional measures, and neuropathology studies examining small cerebral vessel and blood-brain barrier disturbances linking vascular mechanisms to AD.

My research on vascular and metabolic factors affecting the aging brain led to research focusing on HIV as another mechanism of white matter disturbance. I was a co-PI of HIV Neuroimaging Initiative to investigated longitudinal changes in brain function, structure and cerebral metabolite abnormalities, with subsequent R01 grants awarded to me examined HIV and aging. My current research also focuses on obesity, diabetes and metabolic influences on the aging brain, and also the reward and control systems that contribute to obesity.

Upon coming to UF to develop a new clinical translational center for studies of cognitive aging, my research now is also directed more squarely on successful aging, and efforts to identify and develop neuroimaging and laboratory biomarkers that can eventually could be routinely used in clinical settings for the assessment of older adults and as outcome measures in intervention studies. My research also continues to focus on comorbid risk factors and etiologies that impact cognitive and brain aging. My current research includes the study of age-associated alterations of systemic and neuroinflammation, endocrine changes, cerebral energetics, oxidative stress, and GABA-Glutamate alterations as measured by MRS. Another line of research focuses on the use of electrical brain stimulation methods (e.g., tDCS, Vagal Nerve Stimulation) as potential interventions for cognitive aging. Recent studies have also employing fMRI to examine functional connectivity in the context of brain aging, with exciting new findings regarding preservation of visual system and semantic networks into advanced age. This contrasts with our other findings of age-associated alterations in neural systems and declines in other cognitive functions, such as working memory.

March 12, 2019

Dear UFRF Professorship Selection Committee:

I am very excited to enthusiastically endorse Dr. Ronald Cohen, as a candidate for the University of Florida Research Foundation Professorship competition. This nomination emanates from his remarkable accomplishments as a researcher, mentor, and colleague. As Chair, I have had the opportunity to closely observe Dr. Cohen as a researcher, mentor, and graduate teacher. As such, I have a very good sense of Dr. Cohen's work ethic, productivity, mentorship quality, and commitment to our students and university. I believe he is an outstanding candidate for this award.

Dr. Cohen is a national leader in the field of cognitive aging psychology. He is a Full Professor and Evelyn F. McKnight Chair for Clinical Translation in Cognitive Aging, and Director of Center for Cognitive Aging and Memory. He has delivered many invited and keynote addresses at leading neuroscience and cognitive aging conferences. In his career he has authored just under 300 peer-reviewed papers in top peer reviewed venues, written, edited for co-edited five books and an amazing 47 book chapters. Dr. Cohen's productivity has steadily increased over his career. Nearly a third of the publications have come in the last 5 years (15%) of his overall career. According to Web of Science his work was cited over 600 times in 2018 alone.

Dr. Cohen has had continuous NIH funding since arriving at UF in 2012 and throughout his previous appointment at Brown University. In the past year alone, he has brought in nearly \$700,000 as PI or MPI. His research efforts and funding help support the University of Florida Center for Cognitive Aging and Memory and the Clinical Research Training Program of the McKnight Brain Institute that Dr. Cohen has directed since arriving at UF. His outstanding reputation has led to extensive collaboration with other groups as reflected by his simultaneously being a collaborator on projects funded by NIA, NIDDK, NIDA, NIAAA, and NHLBI.

Notably, Dr. Cohen research mentorship has been exemplary. He has mentored a trainee to funding success on an F, T, or K training grant every year for the past 10 years and in some year's multiple trainees in the same year.

Following graduation, almost all of his mentees have gone on to top post-doctoral fellowships and academic appointment at top institutions like Brown University, and even the top ten public University based in Florida. Overall these past mentees have evidenced a growing record of accomplishment in obtaining external grant funding and publications as faculty in a short period of time.

I have had ample opportunity to evaluate Dr. Cohen's judgment and commitment to student training and junior faculty mentoring. He demonstrates without exception, a sincere and steadfast commitment to providing the next generation with a wide array of top notch educational, research, and service opportunities. I know first-

hand from direct feedback given to me from several of Dr. Cohen's students and faculty whom he has mentored that he is viewed as an exceptional mentor and advocate.

I believe Ronald Cohen exemplifies all the characteristics and accomplishments that we as an institution to seek to promote, and the institution recognizes with the UFRF Professorships. Dr. Cohen has certainly not adopted the philosophy of coasting to retirement. He is a driving force in an area of research that aligns closely with institutional strategic goals research in neuroscience (of cognitive aging) that brings distinction to our university. He has been an outstanding citizen, with a focus on research training, external funding, and a model of collaboration across multiple colleges and universities. He remains a passionate and committed Professor. I enthusiastically support and recommend Dr. Cohen for this prestigious award.

Sincerely,

A handwritten signature in black ink, appearing to read "Glenn E. Smith". The signature is fluid and cursive, with the first name "Glenn" being the most prominent.

Glenn Smith, Ph.D. ABPP-CN

Email notification of nomination and request for information

Hi Ron,

The Dean and Associate Dean for research are eager to nominate you for a University Foundation Research Professorship. In addition to the accolades the 3 yr award comes with a 5K salary supplement each year and 3K in research funding the first year. Can you put together a one page personal statement and update the date at the top of your CV by Thursday noon?

G

From: "Cottler, Linda B" <lbcottler@ufl.edu>

Date: Monday, March 4, 2019 at 11:30 PM

To: "Smith, Glenn" <glennsmith@phhp.ufl.edu>

Cc: "Martusewicz, Zoe J" <zoejo109@ufl.edu>, "Perri, Michael G" <mpjerri@ufl.edu>

Subject: time sensitive-Ron Cohen

Dear Glenn, Mike and I met today and we think Ron Cohen is PHHP's best nominee for the UFRF Professorship. Below is the email that we sent today reminding chairs of the particulars. I'd like to ask you to please discuss this with Ron and try to make the 7th deadline. It is quite different this year. I have to first get with the research committee and then I have to give the name to the Office of Research. Then Ron would upload his information online. Ron should also change the date listed on his CV. For now, the header states 2014. Please let me know if you agree with this nomination and if you can handle the letter of nomination or if you need more information. Thanks so much. Linda

A friendly reminder that the UFRF Professorship Awards for 2019 are due, and the deadline has been extended to this **THURSDAY, March 7th 2019**. Department Chairs should send the following attached with your department faculty nomination:

The nominee's CV

A one-page personal statement by the nominee that details his/her recent accomplishments and current research agenda

A letter of support from the Department Chair. If the UFRF nominee is the Department Chair, the letter must come from the Office of the Dean

Please send the materials to Dr. Linda B. Cottler (cc'd above) and copy me on the email as well.

See the attached PDF for more information and timeline details.

Let me know if there are any additional questions or concerns.

Thank you,

Zoe J Martusewicz

Assistant to Dr. Linda B. Cottler, PhD, MPH, FACE
