Activate Alachua County Adolescent Mental Health initiative (Gainesville, FL) 2018-2019

<https://www.activatealachuacountyschools.com/>

Developed and led a grassroots mental health and wellness initiative at Westwood Middle School after the Parkland shooting. The goal was to integrate district wide mindfulness, meditation, and mindful based stress reduction as a starting point for meeting the mental health and wellness needs of students in Alachua County Florida.

This initiative focused on optimizing students’ abilities to contribute effective ideas and strategies that have the potential to lead to solutions, while equipping them with skills to improve their self-awareness, their ability to strategize and set short term and long term goals, their ability to communicate and respect various learning and personality styles, and their ability to gain increased insight on how their actions, reactions, and decisions influence the multiple communities they are a part of, especially their school community.
