Technical Reports

From 1992 through the present, I have led the production of approximately five technical reports per year for the State of Florida examining the quality of care for children enrolled in public insurance programs. These reports include in-depth analyses of health system, child/family, and community factors influencing quality and outcomes of care for the children.

From 2002 through the present, I have participated in the production of approximately 7 to 10 technical reports examining the quality and outcomes of care for older adults, adults, and children receiving

public insurance in the state of Texas. These reports include in-depth analyses of health system, patient/family, and community factors influencing quality and outcomes of care for the children.
